ligature: 5 2 = 2 20,5 (top) 19 (bottom) book. 16 high

middle brown, much stained and effaced  
written in a very cursive hand with a  
thick pen. The writing is arranged in such a way

that a very broad margin is left at the  
right. The top line covers about 16 cm  
the last but one about 13.5 cm, the last  
line 9 cm. On the margin 8 lines  
each about 14 cm. On the back barabola  
the whole breadth of the page.

left on Sunday last 12 Tamuz June-July, no year

Halpern was in the Magrib in 1128, 1130, 1135  
, must also be also 1139 (c. 1135)  
In any of these years, it could also be  
1139 after 1139. For Ibn al-Najda  
in 1140 he was in Egyptian reports in 1141.

He had passed the Sahara in <sup>possibly also the</sup> NA. First in  
Tlemcen <sup>later on</sup> in Tlemcen. Instead of going home  
with the <sup>approaching end</sup> of the travel season, he was ex-  
pected to come to Spain. (l. 16)

An Ibn al-Najda was also in Indian  
waters.

Interesting that Ibn al-Najda was later than Tlemcen
