

11
a 3(2673), f. 6

دست‌نویس

2015 یا 1514

The $\frac{1}{2}$ of 1-18 of 1815, the father of the quantities
is 16. This explains other quantities cost as much
1-16 of 1815, but 1-31 = 180
but not. 1169 was 1815 April 29

Salahim balance written on

March 26, 1169 [breaks into p. 65]

This has Salahim a experimental
approximation cost
